Debit/Credit Reload Centre The VX570 System

A completely cashless smart card system

The Debit/Credit Card Reload Centre is an unattended, secure payment terminal, allowing residents a convenient, secure method of transferring electronic funds from a credit or debit card account to a laundry card.

Cardholders simply insert their payment card into the device and select the desired load amount (\$10, \$20 or \$30). Once the transaction is approved, the laundry card is inserted so the purchased value can be transferred to it.

The reload centre features an easy-to-read display, both English and French prompts and an integrated printer ensuring quality printed receipts.

Our highly experienced operations support personnel will examine your building to recommend an ideal location for the Card Reload Centre.

Set up is easy requiring only a standard power connection and a basic phone line. While the ideal installation is to use a dedicated phone line, the device may share an existing low use phone line. IP-based connectivity is also available.

Benefits to Residents

- Uses a Verifone Vx570 secure PIN pad
- Interac & EMV certified
- Accepts Visa, MasterCard and Debit cards (both Chip & PIN and magstripe)
- Anti-glare white backlit display
- Choice of English or French prompts
- Secure PIN entry
- Integrated privacy shield
- Quiet and fast thermal printer
- Large graphic display
- Durable steel casing with security lock
